IMPLANTONA  **Plandent**

COURSE Overview

HeySmile® Level 1: Certification Course and Hands-on

This two-day certification course is an intensive and certified course aimed at clinicians seeking training in clear aligner therapy. Previous clinical experience with dental aligners is not required. The knowledge and skills obtained in this course can be applied directly in clinical practice.

Day 1 is dedicated to an introduction into clear aligner therapy as an orthodontic tool for clinicians who do not have any prior experience working with aligners. The hands-on session offers tips and techniques for attachment placement and interproximal reduction (IPR).

Day 2 focuses on the **HeySmile®** workflow and platform as well as treatment follow-up.

At the end of the course, you will have the necessary skills to start working with clear aligners with confidence. You can also bring your first case to the course to discuss it with your colleagues and the lecturer.

HeySmile brings together a team of professionals with more than 20 years' combined experience in orthodontic appliances and aligners. We are a high-quality clear aligner provider offering quick and personalised service at flexible prices. HeySmile is part of the Finnish Planmeca Group.

COURSE Programme

Day 1: Fundamentals of clear aligner therapy

08:30 - 09:00

Welcome coffee

09:00 - 12:00

Introduction to clear aligner therapy
Understanding the key concepts
Overview of CAT workflow
What are attachments and IPR (hands-on session)

12:00 - 13:00

Lunch break

13:00 - 17:00

Patient documentation
Diagnosis and treatment planning
Biomechanics and tooth movement with aligners
Q&A

Day 2: Clear aligner therapy workflow

Welcome coffee

09:00 - 12:00

Treatable cases
Keys to better predictability
Creating your HeySmile Studio account
Example study case
Requesting a new treatment

12:00 - 13:00

Lunch break

13:00 - 17:00

Communication with the planning technician
Reviewing the virtual setup
Starting the treatment
Treatment follow-up
Troubleshooting tips and tricks
Q&A

ABOUT the lecturer

Elaine Fediuk

TPD, Head of CAD Design

Elaine Fediuk received her degree in Dental Technology in 2001 from CEPEO in Brazil. She dedicated her career to planning and manufacturing orthodontic and functional appliances as well as full removable prosthetics before starting to work with clear aligners in 2009.

With more than 26 years' experience from dental labs, Fediuk has completed over 9,000 aligner treatments setups and worked for a number of renowned labs. Throughout this time, she has always kept up with the latest technologies and the digitalisation of dentistry.

Fediuk is Head of the CAD and Manufacturing departments at HeySmile.
